EDUCATION

Princeton University

Princeton, NJ

Bachelor of Science in Engineering in Computer Science — Minor: Statistics & Machine Learning Aug. 2022 – May 2026

– **GPA:** 3.81

– **Relevant Coursework:** Data Structures & Algorithms, Programming Systems, Computer Architecture, Machine Learning, Distributed Systems, Cryptography

SKILLS

Languages: Java, Python, TypeScript, Swift, SQL

Frameworks & Tools: Spring Boot, React, Next.js, PyTorch, Firebase, Docker, GitHub Actions

Databases & Cloud: PostgreSQL, Azure

Concepts: Data Structures, Distributed Systems, Machine Learning, APIs, System Design, CI/CD

EXPERIENCE

NJ AI Hub

Princeton, NJ

Software Engineering Intern, Machine Learning

June 2025 – Aug. 2025

- Implemented neural network pipelines to model and analyze plasma stability patterns, improving simulation throughput for fusion research workflows
- Built ML experimentation tooling using PyTorch and reinforcement learning to evaluate candidate material configurations across simulation runs

Zahara Software

Seattle, WA

Software Engineering Intern

June 2024 – Aug. 2024

- Developed microservices-based payment systems using Java and Spring Boot, reducing transaction latency by 25% and supporting 10K+ daily transactions
- Built automated testing infrastructure with JUnit and Mockito, increasing code coverage to 90% and cutting regression bugs by 40%

Princeton University

Princeton, NJ

Machine Learning Research Assistant

Sept. 2023 – Dec. 2023

- Implemented CNN-based image classification models in PyTorch, achieving 92% accuracy on medical imaging datasets
- Applied hyperparameter tuning and transfer learning to reduce training time by 35% while maintaining model performance

Melville Family Foundation

Dallas, TX

Software Engineering Intern

June 2023 – Aug. 2023

- Developed a full-stack educational platform using React and Node.js, serving 500+ students with interactive learning modules
- Integrated OpenAI-powered assistance features, increasing student engagement by 40% based on usage analytics

MTN Group

Juba, South Sudan

Software Engineering Intern

June 2022 – Aug. 2022

- Implemented new features for a mobile money platform using Java and Spring Boot, supporting high-volume daily transactions
- Added automated logging and monitoring tools, improving service uptime to 99.9%

PROJECTS

Icon — TypeScript, Next.js, PostgreSQL, WebSockets

Feb. 2025 – Present

- Built a real-time competitive coding platform with live matches, team contests, and collaborative problem solving
- Implemented WebSocket-based live spectating and code synchronization for concurrent users
- Designed analytics dashboards and integrity checks to detect AI-generated submissions

FlexiGo — Swift, PostgreSQL, Firebase, Azure

Aug. 2023 – Present

- Developed a ride-sharing iOS application using MVVM architecture, supporting 1,000+ concurrent users
- Integrated real-time location tracking with Firebase and Google Maps APIs at sub-second latency
- Optimized database queries and CI/CD pipelines, improving performance by 75% and reducing release cycles by 60%
